PLAYING THE GAME OF MONOPOLY TO WIN

AN ADVANCED PLAYER STRATEGY

KNOW THE GAME RULES – THE CABAL'S WEAKNESSES AND YOUR STRENGTHS

2nd February 2026

---

1. The Two You's: Understanding the Landscape

The fundamental deception of the modern administrative state is the collapse of two distinct entities into one identity. To navigate this system, one must comprehend the dual nature of existence within the legal landscape:

- **The Living You:** The biological, sentient being that breathes, thinks, and creates. This is the source of all "credit energy" that powers the entire financial system.
- **The Artificial You:** A legal construct, a corporate "person," and a registered estate created via the Birth Certificate. This entity is the "player piece" on the artificial Monopoly board of commerce.

---

2. The Agency Trap: Why Movement Tactics Fail

The "Cabal" maintains control through the law of **Agency**, a structure that allows them to govern the living through a corporate intermediary.

- **The Fallacy of Ownership and Control:** The birth certificate entity is a body corporate decedent estate registered to and owned by the state (the Cabal). The living man or woman merely "rents" this artificial construct as its agent. It is a fundamental fallacy to believe that the living agent has inherent control over this entity; the "player" on the board is legally property of the registering sovereign.
- **The Presumption of Identity:** The system operates on the presumption that the living man or woman **is** the artificial entity. This allows the state to attach all taxes, fines, and

liabilities to the estate and enforce them against the living individual through presumed agency.

---

3. Why "Pseudo-Law" Presentments Fail in Courtrooms

Pseudo-law attempts to defeat the system from within its own jurisdiction, which Ecclesia Law research characterizes as a "mimetic trap" or "Cargo Cult Legalism".

- **Jurisdictional Retaliation:** Courts predictably respond to confrontational strategies with contempt charges, civil restraint orders, and aggressive enforcement.
- **Documented Failures of Pseudo Law:**
    - **David Straight (American State National):** Despite claiming diplomatic immunity, Straight was arrested in Texas in 2023 for driving without a license; he was booked and charged like any other citizen.
    - **Karl Lentz (Common Law Court):** Lentz's "man vs. person" oral declarations often result in summary judgments and imprisonment. In his own federal case, his common law arguments failed.
    - **SPC University (GSA Bonds):** Using federal contracting forms (SF-24, SF-25) to "bond out" of criminal cases is viewed as "fictitious instruments," leading to psychiatric evaluations or enhanced sentencing.
    - **"Clive Edwards Living Man" Cases in Scotland:** Individuals who declared "I am a living man under God" were still incarcerated because they remained presumed agents for the artificial construct's liabilities.
    - **“Robin Hood” “Sovereign Project”**: No contract" arguments are structurally impossible within statutory courts and predictably result in evictions and massive cost orders. In practice, followers are often labelled as "unauthorized intermeddles" and held personally liable for the very debts they seek to dissolve.
- **Pseudo-Law vs. Operational Remedy:** Pseudo-Law misreads legal doctrine and uses DIY templates that provoke retaliation. The Republic of Old Souls (ROS) succeeds by exiting the jurisdiction entirely, severing agency structurally through the 98-Series Trust architecture and repositioning jurisdiction as an ecclesiastical envoy and if you cant do this find the Cabal’s Achilles heel and use it to win.

ECCLESIA LAW

The best path to victory is to stop playing as a debtor pawn and start operating as the creditor by recouping abandoned credit and discharging liabilities.

---

4. **The Fallacy of Ownership: The Illusion of the Monopoly Board**

In the current commercial system, the idea that a living man or woman "owns" assets—such as a house, a car, or a business—is a carefully maintained illusion.

1. **The Registered Construct: Rented, Not Owned** The artificial construct is a corporate persona registered to and controlled by the Sovereign/Cabal. Any asset registered to it—from a title deed to a bank account—remains under the ultimate legal title of the creator. You operate as the agent for the game-piece, effectively only renting them from the Cabal.
2. **The Bankruptcy Context (HJR 192)** Since 1933, the commercial system has operated in a state of reorganization, similar to a perpetual Chapter 11 bankruptcy. Everything on the Monopoly board operates under "bankruptcy protection," meaning "legal title" to all property is held as security for the national debt. You are given "equitable title" to use and enjoy property, but the "legal title" remains with the state-controlled board.
3. **The Solution: The Asset Fortress Protocol** The solution is to hold legal title within the **Asset Fortress Protocol**, placing a **new player** on the board—a fiduciary trust or private entity that is not the birth-created construct.
    - **The New Player:** Holds the assets on the board.
    - **The Living You:** Operates as the beneficiary of this protocol. This severs the Cabal's direct line of control through agency.

---

5. **The Art of Legal Warfare: Applying Sun Tzu to the Monopoly Board**

To win, one must establish a position of invincibility before the first move is made.

1. **"Win First, Then Go to War"** Establishing a position where the system's weapons (debt, tax, liability) have no target to strike. This is achieved by moving into the **Envoy Protocol**, reframing your standing away from domestic presumptions.
2. **"Avoid What is Strong, Strike What is Weak"** Avoid the enemy's strength (control over the Birth Certificate piece) and strike at their weakness—the **"Achilles' Heel"**. Audit their "chain of title" or procedural history to find where they failed to follow their own rules.

---

6. Applying Sun Tzu's Principles: Identifying the Achilles' Heel

Some current examples of Achilles heels.

- **FCA vs. Iain Clifford:** Focusing on the "Three Pillars" (No Lawful Prosecutor, No Lawful Service, Misattribution of Evidence) to render court orders a nullity.
- **IRS & Amy Sanger:** Utilizing forensic audit to confirm Aggravated Identity Theft and Wire Fraud, forcing the IRS to accept repudiation of fraudulent filings.
- **Simon Goldberg & Simone Marshall:** A "Regulatory Strike" identifying FSMA 2000 breaches and RICO-level tax fraud to dismantle their standing.
- **David Ayerst & the "Rogue Trinity":** Targeting digital infrastructure for theft of trade secrets and data theft and alignment to Simon Goldberg and Simone Marshall.
- **Any Bank vs. Mortgage Customer (Adverse Claim):** Serving a **Notice of Adverse Claim (UCC § 8-105)**, striking at their status as mere "nominees" who misreported OID income.
- **Coventry Council vs. Resident (Jurisdictional Void):** Identifying procedural non-compliance in Statutory Demands under Insolvency Rules 10.2 and 10.3.

---

7. The Envoy Protocol: The Ultimate Jurisdictional Shield

This moves the battle from a defensive posture to one of structural invincibility. Establishment of invincibility is achieved by striking exclusively at the fatal structural flaw—the **"Achilles' Heel"**.

A Case Study in Strategic Shielding: Iain Clifford vs. FCA

- **Layer 1: The Envoy Protocol (Administrative Shield):** Clifford reframes his standing, asserting Executor capacity for the registered estate and striking at weaknesses (standing, service, misattribution).
- **Layer 2: Physical Relocation (Geographic Shield):** Utilizing North Cyprus as a safe haven where EAW or UK extradition treaties do not apply.
- **Layer 3: Containment and Fighting:** Fighting from safety to ensure the living "battery" is never captured while the administrative war continues.

---

8. Strategic Mastery: New Pieces on the Monopoly Board

Place a **New Piece** on the Monopoly board:

- **The Asset Shelter Protocol:** Establish a secondary construct that does not join liabilities back to the Living Man.
- **Abandoned Credit International Grantor Trust:** Acts as a Nominee to recoup credit originally placed on the board via the Birth Certificate construct.
- **Discharge and Recoupment:** The Living Man transfers energy through the trust to discharge the liabilities of the original Artificial You. This allows for infinite prosperity cycles where debt and tax are discharged while the individual operates via the private treasury.

---

9. The Peaceful Exit: Recoupment from Presumed Nominees

A transition to a capacity-aligned, fiduciary framework resolving liabilities through lawful accounting reconciliation.

1. **The Role of Presumed Nominees:** Identifying entities (Banks, Tax Offices, Trustees, Lawyers) as middlemen rather than owners of credit value.
2. **The Mechanism of Recoupment:** achieved via **Corrective Nominee Filings (Form 1099-OID)**, Ledger Identification (targeting the 945 Master Record), and **Notice of Adverse Claim (UCC § 8-105)**.

3. **Result:** Using the **810 Code Algorithm**, the IRS transfers credits from the public ledger to the **Asset Fortress Protocol (AFP)** private ledger.

---

10. Conclusion: Mastering the Monopoly Board through Strategic Exit

You cannot win a rigged game by playing as the piece you were given.

- **The Illusion of Control:** The living man and woman have been trapped as presumed agents for the birth certificate construct. You are a renter of assets belonging to the registering sovereign under a state of perpetual bankruptcy.
- **Playing to Our Strengths:** Our strength lies in being the **creditors of the Monopoly board**. By placing new pieces (Asset Fortress, 98-Series Trusts), we sever agency. Reclaim the banker role via the **Infinite Money Protocol** and strike at the "Achilles' Heel".
- **The Peaceful Exit:** Resolving the "war" through the **Envoy Protocol** and satisfying the system's logic by discharging liabilities and recouping value.

The debt stays on the board. The tax stays on the board. The liability stays with the fiction. The living are finally free to live.

---

11. Conclusion: Mastering the Monopoly Board through Strategic Exit

You cannot win a rigged game by playing as the piece you were given.

- **The Illusion of Control:** The living man and woman have been trapped as presumed agents for the birth certificate construct. You are a renter of assets belonging to the registering sovereign under a state of perpetual bankruptcy.
- **Playing to Our Strengths:** Our strength lies in being the **creditors of the Monopoly board**. By placing new pieces (Asset Fortress, 98-Series Trusts), we sever agency. Reclaim the banker role via the **Infinite Money Protocol** and strike at the "Achilles' Heel".
- **The Peaceful Exit:** Resolving the "war" through the **Envoy Protocol** and satisfying the system's logic by discharging liabilities and recouping value.

The debt stays on the board. The tax stays on the board. The liability stays with the fiction. The living are finally free to live.
